

Birdy

Michael Koenig 1999

FLORA 

Birdy with a straight sheet metal roof on the one hand, coupled with the strict geometry of the round food tray on the other, creates a perfect balancing act between elegance and ease of use. Like many of our other articles, Birdy has several functions to offer. Four rubber feet ensure stability, and a suspension eye allows it to be hung from a tree. The optional two-section pillar provides stability for use in the garden or in a plant pot.
