

Elmas

Michael Koenig 2014

FLORA 

Elmas is a divider for use both indoors and outdoors and provides excellent protection against prying eyes. Low and tall plants benefit equally from the subtle pattern, which harmonises with both modern and classical ambiances. Its specially arranged wheels ensure not only playful manoeuvrability but also exceptional stability. Two different heights and the impressive width give the system its necessary presence when dividing large areas. However, its low depth also provides advantages in confined spaces.

Planting inserts

Removable planter inserts made of high-quality aluminium are a standard fitting for every FLORA plant container, only the intended use determines whether a water-permeable or a water-proof insert is the right choice, the double-wall design, which creates a layer of air between the plant container and the planter insert, ensures that the root system is protected against heat and frost

FLORA 

Using plants outdoors

Ventilation slits for oxygen in the root systems, water reservoir, insulating air layer for protection against heat, drying out or frost

Using plants indoors

Watertight, light aluminium, optionally with water reservoir and water level indicator
