

Separo Solo

Michael Koenig 2017

FLORA 

Separo Solo is an elegant in- and outdoor screening system which makes use of straight lines. The pattern in the individual elements creates a delightful interplay of light and shade, and the whole construction is light and transparent. The two different heights of the elements result in a varied silhouette which both catches the eye and ensures privacy. The free standing concrete solution of Separo Solo, with two aluminium elements of different sizes, can be arranged very flexibly. Various patterns for the screen design are available. The concrete base gives a save stand and make it also still flexible to arrange. Small planters can be arrange in the structure of the pattern to make a green alive wall possible.
