

**Thallo**

FLORA 2011

**FLORA** 

When modern architecture demands minimalist solutions for greenery, the Thallo family is sure to impress with its function and design. The Thallo system offers three sizes: 40, 70 and 100 cm, of which the 40 cm and 70 cm heights permit all combinations of the three external dimensions. Slender planters for separation purposes are just as easy to create as very large individual planters. Thallo's many variants provide a very flexible range of design opportunities.

## Planting inserts

Removable planter inserts made of high-quality aluminium are a standard fitting for every FLORA plant container, only the intended use determines whether a water-permeable or a water-proof insert is the right choice, the double-wall design, which creates a layer of air between the plant container and the planter insert, ensures that the root system is protected against heat and frost

# FLORA

### Using plants outdoors

Ventilation slits for oxygen in the root systems, water reservoir, insulating air layer for protection against heat, drying out or frost

### Using plants indoors

Watertight, light aluminium, optionally with water reservoir and water level indicator
