Tracks

Michael Koenig 2012

Thanks to the straight basic shape and four sizes of Tracks, there is almost no limit to the opportunities for structuring space. Beautiful details such as the ribbing on the sides and the sophisticated design on the front allow the planters to play a special role. What's more, an hydroponic system makes "Tracks" perfect for indoor use.

Planting inserts

Removable planter inserts made of high-quality aluminium are a standard fitting for every FLORA plant container, only the intended use determines whether a water-permeable or a water-proof insert is the right choice, the double-wall design, which creates a layer of air between the plant container and the planter insert, ensures that the root system is protected against heat and frost

Using plants outdoors

Ventilation slits for oxygen in the root systems, water reservoir, insulating air layer for protection against heat, drying out or frost

Using plants indoors

Watertight, light aluminium, optionally with water reservoir and water level indicator
