

Construction tools

Indispensable for preparatory soil compaction work are robust tools like the rammer with rubber dampers. Our lifting tong helps to move all sort of stones etc. up to 80 kg. The classics such as spades or american shovels complete the range.

Rammer For solidifying work, damper compensates for lateral impacts. Steel, rubber damper, straight handle, PU 1

Number	Area W × D (cm)	Weight (kg) approx.	Height (cm) approx.	Handle
04626/20	20 × 20	9.0	115	straight
04627	20 × 20	9.0	85	T-form

Lifting tongs For lifting kerbstones, virgin stones, concrete elements, pipes, etc. Steel, exchangeable rubber grip surfaces, PU 1

Number	Diameter range (cm)	Immersion depth (cm)	Max. permitted load (kg)	Weight (kg) approx.
04630	0 – 37	20	80	4.9

American shovel Original shovel (Ames Union Tools) for using with plants and in soil. Carbon steel, 10 years warranty on the blade, tread shaped to the front, swan's neck, long handle guide, PU 6

Number	Meas. blade L × W (mm)	Handle	Ames brand	Deployment
02400	270 × 210	ash	Union Tools	standard
02402	270 × 210	fibre glass	True Temper	standard

Shovel American-type, serrated edge Universal shovel with serrated edge for easy penetration into rooty soil, 10 years warranty on the blade. Hardened blade, tread formed to the rear, long handle guide, ash shaft, PU 6

Number	Meas. blade L × W (mm)	Handle
02415	300 × 220	ash

Gardening spade IDEAL spades for digging work. Hardened blade, clamp socket, riveted, step brackets, ash T-handle, PU 1

Number	Meas. blade L × W (mm)	Length handle (cm)	Execution
02425	285 × 185	85	high-performance
02426	280 × 190	85	standard
