

Hoes, scuffle hoes and scrapers

Irresistible – the Professional hoes succeed easily against weeds and unwanted vegetation on flowerbeds and paths. Their strong steel blade is available in different shapes, replaceable and screwed to a sturdy shaft. Our heavy hoes have forged blades. They are the right tool for clearing and cultivating heavy soils.

We're happy to assist you. Please contact us

Light-weight hoes

FLORA's professional hoes have a hardened blade which is screwed to the sturdy shaft. The blade can be removed and replaced.

Heavy hoes

Our tough hoes have gone through fire! Whether for roots, stones, or stubborn old vegetation - the blades and shaft of the heavy hoes are forged and cope with everything.

Weed remover

The kerbstone cleaner is a special device for communal cleaning. It helps to clean drains, so it prevents dangerous flooding.

Sturdy shaft

Screwed joint

Hardened, replaceable blade

Made in Germany
