

The Urbano-concept **Transport systems for electromobility**

Urbano is a transport system unit for vehicles which support the process of landscape maintenance and outdoor cleaning – and it doesn't matter which movement platform an Urbano transport system unit is fitted on.

We're happy to assist you. Please contact us

Cooperations

We work very closely with various manufacturers and provide coordinated solutions for the relevant vehicle types. These solutions range from cargo bikes to street-legal electrical commercial vehicles with an enclosed driver's cab: Garia (page 64), Goupil, M Products, Zallys, Radkutsche (from top left to bottom right).
